EDUCATION

[The Pennsylvania State University](#)

Bachelor of Arts in **Digital Media, Arts, and Technology** — May 2026
GPA: **3.93** | Dean's List: Fall 2022 – Spring 2024

[Schreyer Honors College](#) — Fall 2024 – Spring 2026

[Redbank Valley High School](#)

August 2018 – June 2022

AWARDS

[Council of Fellows Undergraduate Student Research Award](#) - 2026

- *"Recognizes undergraduates with demonstrated research proficiency and strong potential for independent scholarly work"*

[Eric and Josephine Walker Award](#) - 2026

- *"Recognizes an undergraduate student for possessing outstanding qualities of character, scholarship, leadership, and citizenship and for contributing to programs and services that positively influence fellow students and enhance the prestige and well-being of their campus and the reputation of the University as a whole"*

Best Film/Animation — for *Low Power*, [Spring Yahn Art Show](#) - 2026

Best in Show — Digital Art for *Routine Rust*, [Spring Yahn Art Show](#) - 2024

SPEAKING & PUBLICATIONS

[Sustain3D: A Practical Framework for 3D Data Preservation](#) — **Honors Thesis**

- Conducting and presenting ongoing honors thesis research (*Sustain3D*) through Schreyer Honors College, focused on sustainable 3D data preservation and accessible archival workflows.

Teaching and Learning with Technology Symposium (Penn State)

Presenter | Mar 21, 2026

- Presented *LabVis* alongside creator Bibiana Mayer Steckel and others at the 2026 Teaching and Learning with Technology Symposium

WORK EXPERIENCE

Virtual and Augmented Reality Lab (VAR Lab)

Immersive Administrator | Nov 2022 – Present

- Lead interdisciplinary teams in the design and development of immersive, visually-driven applications, combining game design principles, 3D environments, and interactive storytelling across Unreal Engine, React Native, and XR platforms
- Direct full project lifecycles with a focus on creative vision, user experience, and visual cohesion, from concept art and prototyping to polished final delivery
- **Develop immersive training experiences** that integrate 3D assets, motion graphics, video editing, and intuitive UI systems to communicate complex ideas clearly
- Create high-impact visual branding and media content, including logos, motion graphics, apparel, and promotional materials, ensuring strong and consistent design language across projects
- **Perform 40+ LiDAR and structured-light scans** using iPad Pro, Artec Eva, and Artec Spider
- Conceptualize and build interactive installations and experiential exhibits, blending physical fabrication with digital design to create engaging, user-centered experiences
- Build and maintain interactive installations to showcase lab research and outreach
- Led public-facing outreach and educational demonstrations at community events, including a **Girl Scouts immersive technology workshop** and the **YEP Erie showcase**, introducing XR, VR, and interactive media concepts to students, educators, and local professionals through hands-on experiences

Selected VAR Lab Projects

- **Accessible Arm Cast Project:** Designed and prototyped a functional 3D-printed assistive device
- **Projection Mapping Installations:** Designed multi-surface projection experiences for events and exhibits
- **Room Scan & Pre-Visualization Models:** Generated spatial layouts for studio planning using FARO Focus LiDAR data
- **VARcade:** Designed, wired, and fabricated a multi-console arcade cabinet (Xbox 360, Wii, Raspberry Pi)

- **Retro TV Project:** Built a CRT-based Raspberry Pi media display looping custom branding content
 - **AR Sandbox:** Developed a Kinect-based real-time topography visualization system
-

Snap-Tite Quality Assurance Application (VAR Lab)

Project Lead | Fall 2024 – Spring 2025

- Designed and integrated interactive environments, UI systems, and video-based instruction, combining elements of game design and media production
 - Directed collaboration between designers, developers, and media creators, ensuring visual consistency, usability, and engaging user experience across the application
 - Delivered a functional prototype emphasizing clarity, interaction design, and polished visual presentation
-

Borough of Wesleyville

Graphic Designer | Jan 2023 – 2024

- Designed a complete visual identity system, including a municipal flag, branding assets, and custom iconography for digital platforms
 - Created print and digital advertisements with strong layout, typography, and visual hierarchy to support community initiatives
 - Contributed to multimedia production, assisting with recording setup and visual/audio content for public communications
-

Athena Erie

Photographer | Oct 2023 – 2025

- Captured and delivered professionally composed, event-driven visual content, emphasizing storytelling, lighting, and subject focus
 - Selected as sole photographer based on consistent visual quality, reliability, and creative execution under live event conditions
-

Mint Condition Auto Detailing

Cofounder (informal), Branding & Visual Identity | 2021 - 2022

- Led creation of full brand identity including logo, color system, and visual direction for a startup auto detailing business
 - Developed cohesive marketing assets and social media visuals to establish a consistent and professional brand presence
 - Supported early-stage growth through branding strategy, positioning, and business development initiatives
-

ACADEMIC PROJECTS

Art Installations

Interactive Projector Installation - Spring 2026 Yahn Art Show
Creative Technologist / Developer | April 2026

- Developed an interactive installation using a depth camera and Processing 4 to track viewer movement in real time
- Programmed software that detects presence and dynamically overlays frames and artwork metadata (artist, title, date)
- Designed an engaging gallery experience that merges physical artwork with responsive digital augmentation

Game Development Projects — Unreal Engine

Watcher's Trials (GAME 160 Honors)

- Designed and developed a room-scale VR experience featuring puzzle-based trials, environmental storytelling, and multiple endings
- Implemented custom interaction systems and assets entirely in Unreal Engine

Lamplight (GAME 250)

- Developed a five-level Unreal Engine game with advanced lighting-driven mechanics
- Modeled, textured, and optimized all assets using Blender and Substance Painter
- Awarded Best in Class for technical execution and design

Project Corpo (GAME 480)

- Co-developed a comedic first-person stealth game in a three-person team
- Served as primary visual designer, creating 149 custom assets including 117 3D models, 17 pieces of 2D art, and 15 animations
- Built assets in Blender and Substance Painter and integrated them into Unreal Engine 5
- Contributed to level design, player interaction systems, and environmental storytelling

Digital Film & Animation Projects

Low Power (DIGIT 220)

- Created a CGI short film combining live-action footage with Blender-generated digital elements

Routine Rust (DIGIT 409)

- Directed a three-minute animated film using Blender and After Effects
- Winner, Best in Show — Digital Art, 2024 Spring Yahn Art Show

Image to 3D (DIGIT 400 Honors)

- Translated 2D reference imagery into a fully realized 3D pumpkin model
- Focused on form reconstruction, topology cleanup, texturing, and presentation
- Explored the transformation of flat visual data into volumetric digital objects

Video Production Experience

LabVis Research Tutorials (VAR Lab / Fulbright Project)

- Produced instructional video tutorials for a research manual developed for a Brazilian Fulbright Scholar at UFCSPA, supporting the *LabVis* project with clear, structured visual guidance.

VAR Lab TV Installation Intros

- Created 26 original intro sequences recreating vintage television show

VAR Travels (VAR Lab Talk Show)

- Filmed, edited, lit, and produced episodes of the VAR Lab talk show “*VAR Travels*”, along with additional internal video media projects.

High School Morning Broadcast Program

- Directed and produced recurring morning TV shows, managing scripting, filming, editing, and live production.

Digital Humanities & Web Projects

Simpsons Season Analysis (DIGIT 210)

- Built a GitHub Pages site using HTML, CSS, XML, and text-analysis tools

Dennis the Menace Comic Encoding (DIGIT 110)

- Team lead for an XML/XSLT comic encoding and analysis project

Sustain 3D (Schreyer Honors Project)

- Developed and maintained a public academic project website

Echoes of HistERIE

- Project Manager for a five-person team developing an immersive history app using React Native and 3D media
- Delivered the project within two semesters and under budget

TECHNICAL SKILLS

3D & Game Development

Blender, Unreal Engine 5, Substance Painter

Design & Media

Illustrator, After Effects, Premiere Pro, Adobe Express

Web & Code

HTML, CSS, GitHub, React Native, Three.js

Scanning & Hardware

Artec Studio, LiDAR, Structured-Light Scanning, Raspberry Pi, Kinect

Collaboration & Productivity

Microsoft Teams, Word
